

1. Forked, then cloned Protobot
2. Imported Project into Eclipse

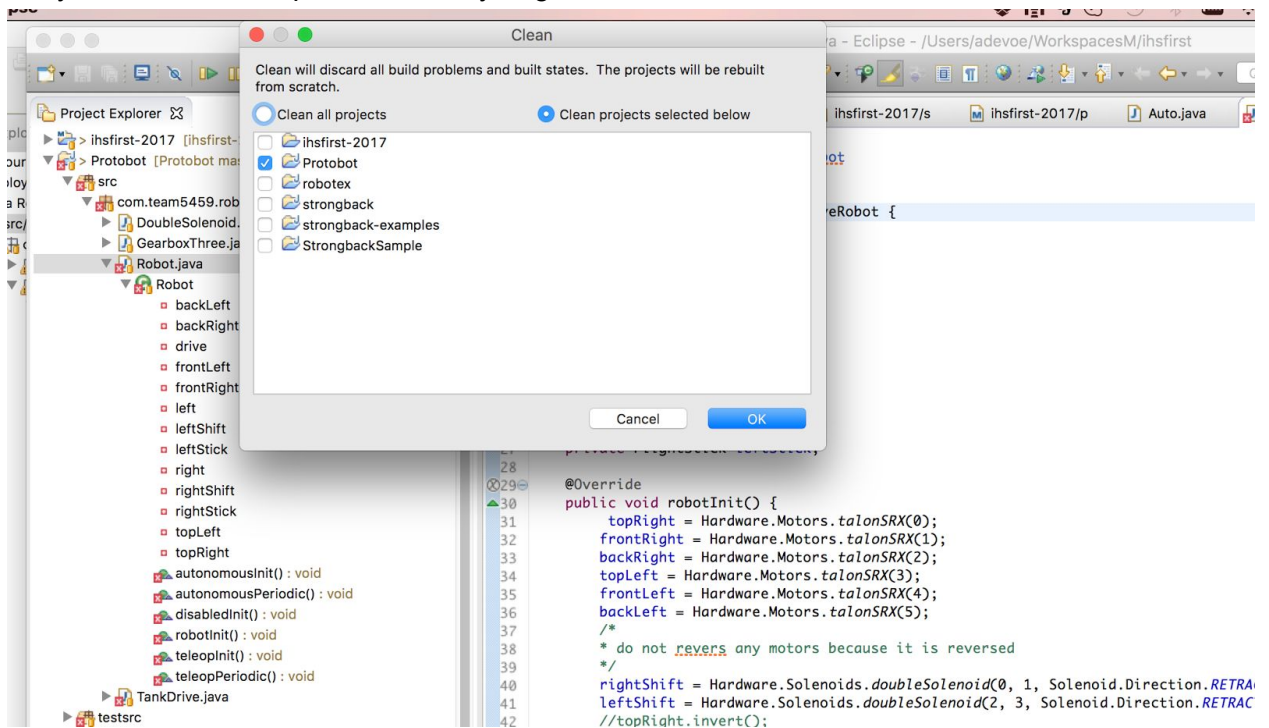

3. I had some compiler errors (see red x's on left). The problems pane indicated that the compiler version was wrong, so we need to update the Java compiler

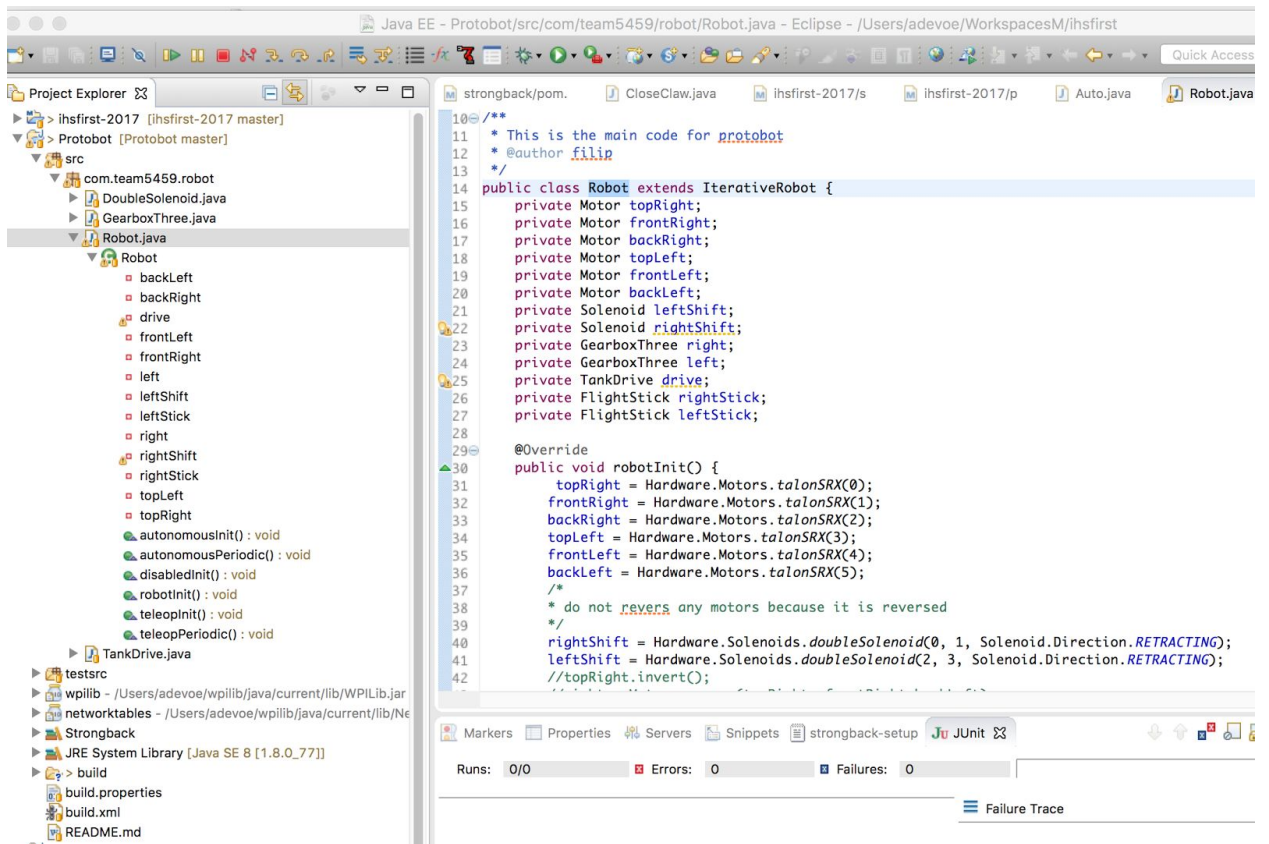

4. After hitting OK, the compiler is now set up to be JDK 1.8. However, we still had red, so I went to the "Projects" dropdown on the toolbar and rebuilt the project. The red x's went

away - now we're compiled and ready to go.

5. Picture after the robot compiles. (No red x's)

6. Look at the protobot Movie now.
